**Electric Vehicle Charging Association Supports Language to Implement Governor’s Executive Order on Zero Emission Vehicle Infrastructure**

SACRAMENTO, CA—The Electric Vehicle Charging Association (EVCA) is pleased with the release of language to implement the Governor’s Executive Order on Zero Emission Vehicle Infrastructure.

EVCA prioritizes the expansion of clean transportation and an accompanying supportive infrastructure through collaboration with the private sector, utilities, other state agencies, drivers and other stakeholders to ensure investments are well-coordinated. “We are ready to work with the Governor’s Office and all stakeholders to ensure that innovative, sustainable models are maximized to make EV charging accessible and affordable to all.”, said EVCA Director Jim Ross. “We look forward to continuing our work with the California Energy Commission on grant opportunities that embrace innovation and the multiple charging business models that have emerged.”

Established in 2015, EVCA is a not-for-profit trade association that brings together leaders in the EV charging industry to educate policymakers, stakeholders and members of the public about the critical role of EV technology, infrastructure and services and to advocate for policies that will expand clean transportation. Current members are ABM, BTC Power, ChargePoint, Clean Fuel Connection, Inc., Envision Solar, EV Box, EV Connect, EVgo, SemaConnect, and Volta Charging. More information can be found on our website, [www.evassociation.org](http://www.evassociation.org).
